EXPERIENCE

Designer & Front-End Developer — [HelpCloud](#) — Jan 2020 - current

- Designed and coded the [HelpCloud merchandise site](#) using Shopify and the Liquid language
- Created a design system for UI components in Figma which I applied to the [HelpCloud shopping cart](#) using the Apex language in Visualforce pages
- Designed the [HelpCloud website](#) and contributed to front-end code using the Go language in the Hugo framework
- Conducted internal focus groups to gather feedback on current Salesforce UX experience and worked to implement improvements to UI

Web Developer Intern — [Impossible Bureau](#) — May - Sept 2019

- Worked on a variety of clients' webpages using React, creating innovative solutions using React Redux, Styled Components, and the Green Sock Animation Platform (GSAP)
- Used CSS animations and Styled Components for various UI components, including photo upload process, image carousel, and glossary
