## SUMMARY

English waitress turned self-taught baker transferring into web development.

Having spent the last half of my 20s traveling and working in various parts of the world, I am now energized to advance my knowledge and skillset in a creative and ever growing industry.

## PROJECTS

**Time to Travel** ● [time-to-travel.fun](https://time-to-travel.fun)

**React, Javascript, CSS, Node.js, SQL, Express, Sessions, Bcrypt, Nodemailer**

Full stack CRUD wanderlust journal for travellers, built in React. Designed all graphics from scratch in Figma, and animations are pure CSS. Bcrypt to safely store and hash passwords. Nodemailer to notify the user of a successful registration. Awarded Best CSS.

**Fridge-Raiders** ● [fridge-raiders.site](https://fridge-raiders.site)

**React, Javascript, SCSS, Node.js, SQL, Express, Sessions, Bcrypt, Git**

Worked as part of a group to create an inspiration site for the amateur cook. Users enter the contents of their kitchen to see a list of recipes. Main tasks were prototypes and implementing the design and animations in code to be responsive across different device sizes. Created a color scheme and logo for our 'Fridge-Raiders' identity using Figma.

## EDUCATION

**V School, Jan - April 2019**

Scholarship for the immersive full stack web development program awarded by Adobe. Solidifying Javascript fundamentals and React skills. Learning MongoDB and Mongoose.

**DevMountain, June - December 2018**

DevMountain is an accelerated learning program for full stack web development.

**University of Wolverhampton, 2006 - 2009**

Bachelor of Arts (with honours) Interior Design.

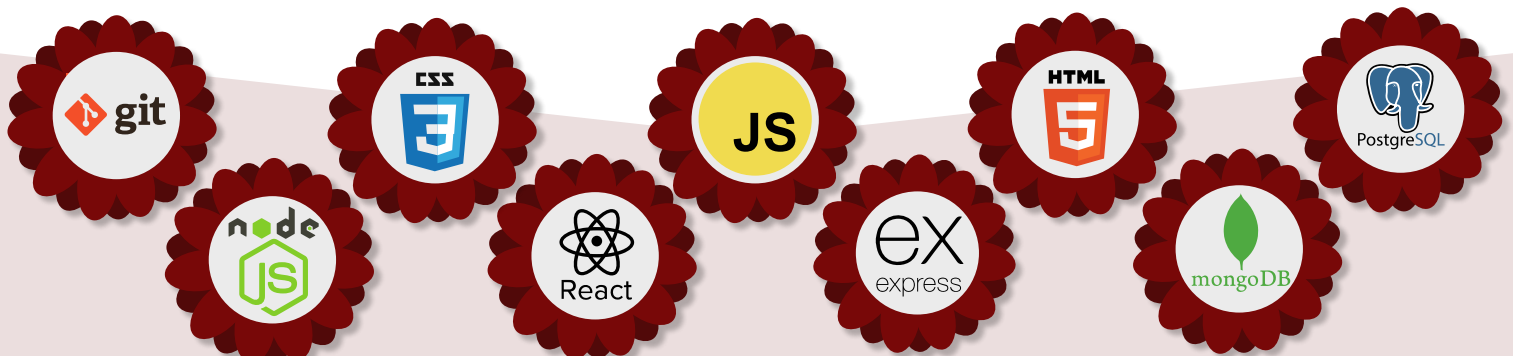

## EXPERIENCE

**Baker at Paisley's Restaurant, 2017 - 2018**

Had the pleasure of being solely responsible for all delicious cakes and treats in a popular restaurant in the south west of England.

**Waitress at L'Opera Caffe, 2016**

Integral member of a busy restaurant team due to being in a central tourist location in Florence, Italy. Point of communication between kitchen and customers. Became a local tourist problem solver and guide.

Actively learning:

Javascript React CSS HTML Node.js Git SQL Express Massive MongoDB Mongoose
