Employment

Frontend Web Developer and UX Designer
HelpCloud, January 2020 - present

- Engineered frontend code across three company websites using different technologies.
- Developed a company design system in Figma which I applied to the HelpCloud website domain and subdomain in Salesforce and Hugo.
- Self managed all projects and consistently delivered on time.
- Led internal focus groups and interviews to gather information on the Salesforce experience and improved processes and efficiency as a result.
- Communicated with all roles in order to collaborate and reach company goals.

Web Developer Intern
Impossible Bureau, May 2019 - September 2019

- Supported customer requests by implementing photo upload processes, image carousels, and an extensive glossary page using React, React Redux, Styled Components, CSS animations and the Green Sock Animation Platform (GSAP).

Server and Baker
2009 - 2018

- Volunteered and worked in New Zealand, Australia, Italy, Switzerland, and England.
- Experienced a variety of customer service roles which required organization, communication and interpersonal skills, initiative, and working to strict deadlines.

Education

Full Stack Web Development at V school
January 2019 - April 2019
Awarded Adobe Digital Academy scholarship to learn JavaScript, HTML, CSS, React, MongoDB, Express, Node, and Git.

Full Stack Web Development at DevMountain
June 2018 - December 2018
Implemented JavaScript, CSS, React, PostgreSQL, Express, and Node within various personal projects and worked within a team utilizing Git for version control.

BA Interior Design at the University of Wolverhampton
September 2006 - July 2009
Modeled spaces with AutoCAD and ArchiCAD software and built small-scale models.

Related Experience

Tech-Moms mentor: Teaching HTML, CSS, and JavaScript to women switching to tech careers.
Kids Code Camp volunteer: Helped introduce a class to JavaScript fundamentals.
Best CSS: Voted by DevMountain instructors for my capstone React project.
