SUMMARY

In my life before code I was a baker, waitress, and traveller of the world. I moved here from England to pursue a career in web development. The creative potential of the tech industry really excites me and I want to help make it fun and inuitive for everyone.

STRENGTHS

Javascript
React
CSS & Styled Components
HTML
Version Control
Figma & Illustrator

EXPERIENCE

Impossible Bureau, Intern Web Developer, April - September 2019
Completed a variety of challenges, some with imminent deadlines. Solved front end problems in React Boilerplate using Sagas, Selectors, Redux, GSAP and Styled Components. Replicated pixel perfect designs.

PROJECTS

Cat Chase - cat-chase.herokuapp.com
React, Javascript, CSS, Node.js, MongoDB, Mongoose, Git
As a group we created this PacMan-esque 2D collision detection game, using Javascript for all game logic. I designed, styled, and helped with the movement of the cat, generation of the fish, and movements of the dog you must evade!

Fridge-Raiders - fridge-raiders.site
React, Javascript, SCSS, Node.js, SQL, Express, Sessions, Bcrypt, Git
Worked as part of a group to create an inspiration site for the amateur cook. Users enter the contents of their kitchen to see a list of recipes. My main tasks were prototyping, and implementing the design and animations in code to be responsive across different device sizes. I created a color scheme and logo for our 'Fridge-Raiders' identity using Figma.

EDUCATION

V School, SLC, January - April 2019
Scholarship for the immersive full stack web development program awarded by Adobe.

DevMountain, Provo, June - December 2018
Accelerated learning program for full stack web development.

University of Wolverhampton, UK, 2006 - 2009
Bachelor of Arts in Interior Design
